Dear Mr. Krueger:

Unfortunately neither of those dates are possible due to existing commitments with other EPA officials - nonetheless I am trying to get together with other PRPs to put together a joint sampling and removal proposal to begin ASAP. I'll propose another date right after I meet with them, if you don't mind.

As Mr. Zintak may have told you, I did send a representative up to Minneapolis to view the site and discuss the matter with EPA and the State. If you know, please tell me how big the record is on this matter to decide whether to send my assistant up with a scanner or just have you send a copy to me.

My attachment should have been a .pdf file - you can open it using the Adobe Acrobat Reader. At any rate - it was just my fax to Zintak - but in an e-mailable version - since I didn't know your fax number but could look up your e-mail.

Thanks.

David M. Cleary  
W. R. Grace & Co.
